

The Four Iron Steamships
of
William Alexander Lewis Stephen Douglas – Hamilton. KT
12th Duke of Hamilton, 9th Duke of Brandon, 2nd Duke of Châtellerauld
Second Edition.

1863

Easton Park, Suffolk, England (Demolished 1925)

Hamilton Palace, Scotland (Demolished 1927)

Introduction

The families residing in the village of Easton, Suffolk experienced many changing influences over their lives during the 92 year tenure of four generations of the Hamilton family over the 4,883 acre Easton Park Estate.

The Dukes of Hamilton were the Premier Dukedom of Scotland, owning many mansions and estates in Scotland together with other mining interests. These generated considerable income. Hamilton Palace alone, in Scotland, had more rooms than Buckingham Palace.

Their fortunes varied from the extremely wealthy 10th Duke Alexander, H.M. Ambassador to the Court of the Czar of Russia, through to the financial difficulties of the 12th Duke who was renowned for his idleness, gambling and luxurious lifestyle. Add to this the agricultural depression commencing in 1870. On his death in 1895, he left debts of £1 million even though he had previously sold the fabulous art and silver collections of his grandparents.

His daughter, Mary, then aged 10 inherited Easton and the Arran estates and remained in Easton, with the Dowager Duchess until 1913 when she married Lord Graham. The estates were subsequently sold and the family returned to Arran.

This is an account of the lives of the two passenger paddle steamers and two large luxury yachts that the 12th Duke had built by Blackwood & Gordon of Port Glasgow and how their purchase and sales fitted in with his varying fortunes and lifestyle.

It is interesting how history turned a full circle.

Brian Boon

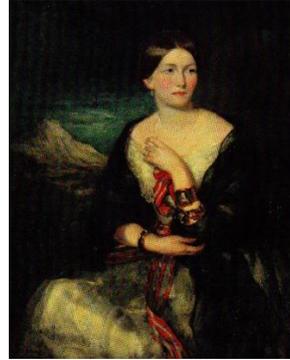

Brief Biography and Time Line of the 12th Duke of Hamilton

William Alexander Douglas-Hamilton was born at Connaught Place, London, 12th March 1845. He died in Algiers 16th May 1895. Premier Scottish nobleman.

He was the son of William, 11th Duke of Hamilton and Princess Marie Amelie of Baden, whose mother was a cousin of Emperor Napoleon III.

William 11th Duke

Princess Marie

He was educated at Eton College and Christchurch, Oxford and a description of him at the time was “...at Christchurch he went in for boxing, as he went later for horse-racing, yachting and other amusements.... He was full bodied, of a rudely, ruddy complexion, had a powerful neck and seemed strong enough to fell an ox with his fist. He had a frankness bordering on rudeness.”

In 1863 at the age of 18 he inherited all his father’s estates and titles, including one of the finest art and silver collections in Europe compiled by his grandparents, the 10th Duke and his wife Susan Euphemia Beckford, daughter of the wealthy art collector and musician William Beckford.

Four years later, in 1867 he was close to financial ruin when his racehorse Cortolvin won the Grand National, earning him £16,000 from the bookmakers and a substantial sum of prize money.

1868 –The first steamship, the Passenger Paddle Steamer *Lady Mary* was launched.

1870 – The first single screw Steam Yacht *Thistle* was launched.

1871 – The Paddle Steamer *Lady Mary* was accepted by Blackwood & Gordon, Port Glasgow, in part payment for his larger replacement *Heather Bell* which was also launched that year.

In December 1873, he married Lady Mary Montague, daughter of William Montague, 7th Duke of Manchester at Kimbolton Castle and they had one daughter, Lady Mary Hamilton, later the Duchess of Montrose.

Vanity Fair commented “*The Duke at the age of 28 paints a picture of idleness and dissipation, it is the curse of his life that he has never learnt to find pleasure in aught but idleness.*”

1874 – Easton Park Mansion underwent considerable improvements including spacious new stables, together with gas lighting and a gas works built behind the present day Easton Hunt Kennels.

(New 1874 Stables)

(1874 Mansion with original White House in the background)

1874 – The Steam Yacht *Thistle* was sold to a Mr John Penn Sr.

1875 – Developed the Model Farm, with Dairy and Slaughter House, to ‘Indulge the Duchess’.

1876 – The Paddle steamer *Heather Bell* was sold.

1881 – A second Luxury Steam Yacht also named *Thistle* was launched.

1881 – The Christmas Night fire destroying most of the stable block, which he had rebuilt.

(The rebuilt Stables)

He had larger estates in Scotland to maintain as well, including Hamilton Castle and Brodick on Arran.

In 1882, to fund his expenses and lifestyle, William sold the collections built up by his grandparents. The auction lasted seventeen days and amassed a grand total of £397,000 (about £40 million at 2014 values) and included books, manuscripts and paintings by a number of masters.

(Please see Appendix 2 for example of one vase and gold stand, called the Hamilton - Rothschild tazza, handed to the National Museums of Scotland in lieu of death duties on the estate of Edmund de Rothschild, in 2012.)

He later extended the mansion at Easton and fitted it with gas and electric lighting. However his health was deteriorating, he was overweight at 20 stones and suffered from gout, dropsy and kidney

problems. He was advised to spend time on his yacht *Thistle* in the Mediterranean and he left in January 1895.

26th January 1895, he left Ipswich Docks in *Thistle* for the South Coast, his wife and daughter leaving for London. On the 2nd March he, together with his wife and his physician, set sail for Lisbon. The Duchess and his physician returning to London on 9th March.

27th April, his yacht arrived at Gibraltar, he then had kidney problems and was advised to remain in a warm climate and *Thistle* moved to Algiers. Early May, after chartering special trains from Wickham Market, the Duchess travelled to Algiers to join him at the end.

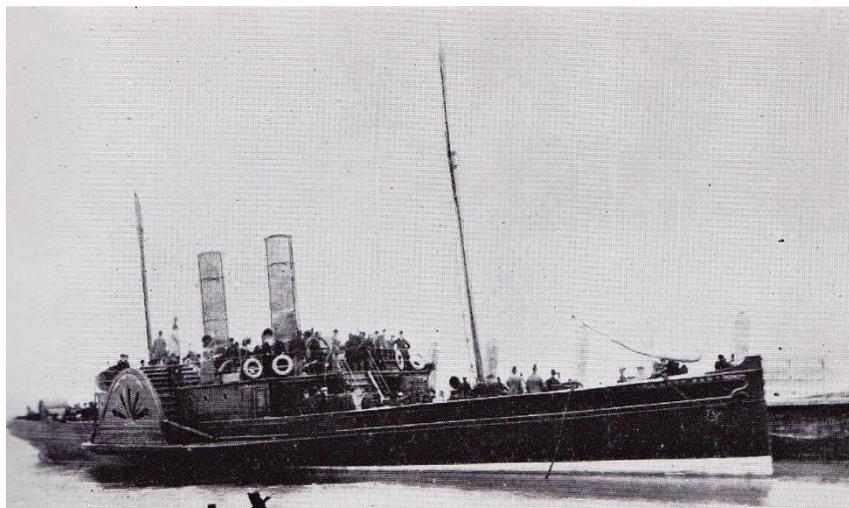

He died on the 16th May in Algiers and after embalming, his body was returned to England on the *Thistle*.

His daughter, the Lady Mary inherited his Estates of Easton and Arran, including Brodick Castle. The debts and title went to Alfred Douglas-Hamilton, a poor naval Lieutenant, together with Hamilton Palace. Other smaller estates and moveable property, including *Thistle* were subsequently sold to clear debts. The process took 13 years to complete.

1895 – His second Steam Yacht *Thistle* was registered to Rear Admiral Sir C.G. Fane KCB.

History of the four steamships.

Lady Mary

(When owned by John Boyle, at Burnham Pier on the Bristol Channel Routes)*

Lloyds Register of Ships – Lloyds Register

Remarks: Named after Mary Victoria, the Duke's daughter.

Note * - James Dew Collection – West Country Passenger Steamers, Grahame Farr, 1967

In Grahame Farr's book, *West Country Passenger Steamers*, she is described as 179 grt iron two-funnelled paddler built and engined by Blackwood and Gordon at Port Glasgow, in 1868, for Ardrossan owners to run between that port and Arran, her name being that of the daughter of The Duke of Hamilton.

The Clyde River Steamers Club magazine, *Clyde Steamers No 33*, in an article by James C. Speirs describes *Lady Mary* as follows "With huge paddle boxes, a straight stem, two black funnels and oscillating engines". She was put in competition with The Isle of Arran, owned by the Ardrossan Steamboat Company resulting in that service being sold at the end of 1886 and the company ceased trading.

An article in *Clyde Steamers No 21*, by Peter Milne, records that "The *Lady Mary* developed the trade to such an extent that a larger boat was ordered, *Heather Bell*.

Capt. James Williamson in *The Clyde Passenger Steamers (1904)* states that 'The builders of the new steamer took *Lady Mary* in part payment and it was they who sold her to a Mr William Watson in 1871. However due to *Heather Bell* proving unprofitable and too costly to run, *Lady Mary* was chartered from Mr Watson and returned to her old station for the better part of two years, before being sold for service in The Bristol Channel. In 1873 *Lady Mary* was employed in odd trips. In December of that year she was sold.

In 1874 the vessel was bought by Mr John Boyle of Cardiff (Bute Docks Authorities) and transferred to William T. Lewis on 1st January 1887 for whom she continued until 1890 when she was scrapped.

A press report on 16th August 1876 that *Lady Mary* ran an excursion from Neath, near Swansea to Weston-Super-Mare.

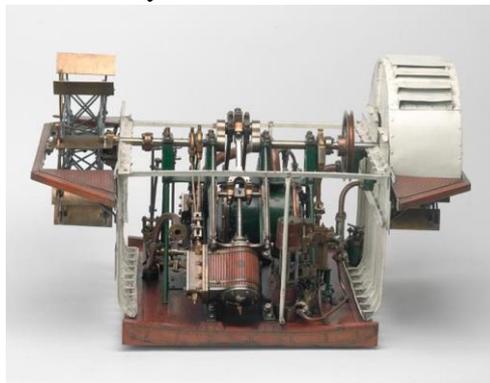

Between 1882 and 1883 she had spells on the Burnham – Cardiff ferry, besides varied excursion runs. In 1883, she returned to the Cardiff – Bristol and other routes.

She was laid up in 1889 and broken up in 1890.

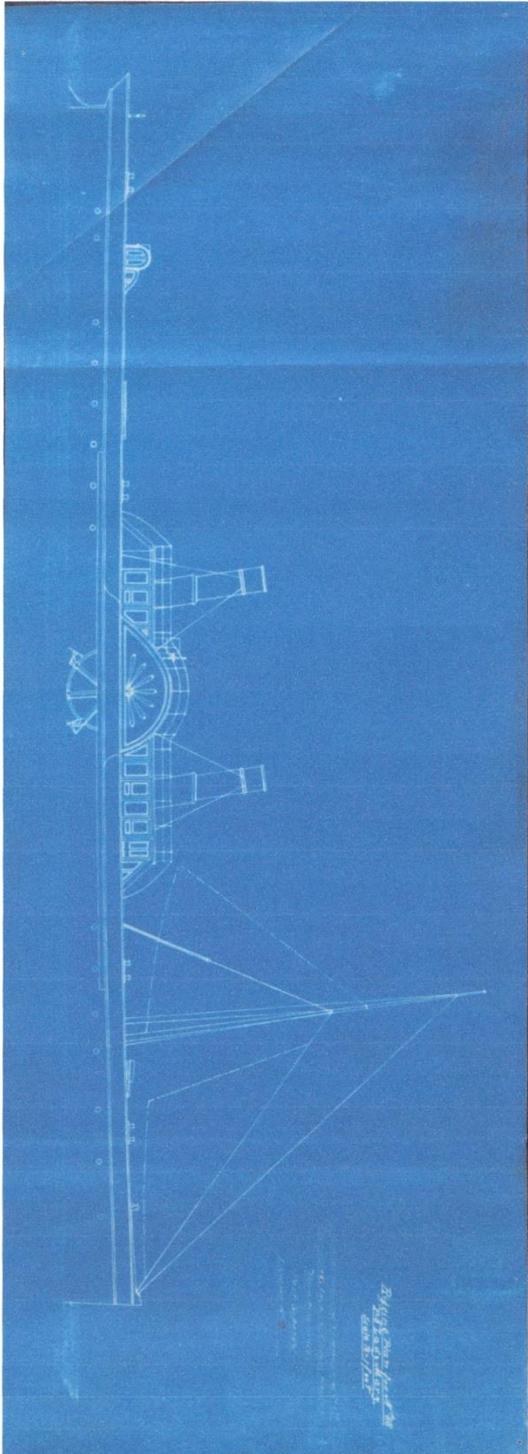

(The *Lady Mary* at Howells, Bristol - date unknown)*

Lloyds Register of Ships – Lloyds Register

Vessel History: 1899 sold to T. W. Ward Ltd for scrapping but then resold (chartered to various operators) but payments to Ward were not made and the ship was seized at Liverpool in September 1900

Fate: Scrapped by T.W. Ward Ltd in 1902 and broken up.

Note Iain MacLeod, Clyde Steamers Magazine, No 48, Summer 2012*

Heather Bell was more luxurious and faster than the *Lady Mary*.

Clyde Steamers No. 21, Peter Milne, describes her as flushed deck, with a single funnel and reputed to have been a fine steamer and very fast. But she was decidedly uneconomical and therefore proved to be a failure.

Spiers in Clyde Steamers No 33, reports even further to the effect that "...the Ardrossan- Arran trade, however, could not justify the extravagance. The new boat, especially, used so much coal that she just did not pay, consequently both steamers were withdrawn from the Arran service by 1873."

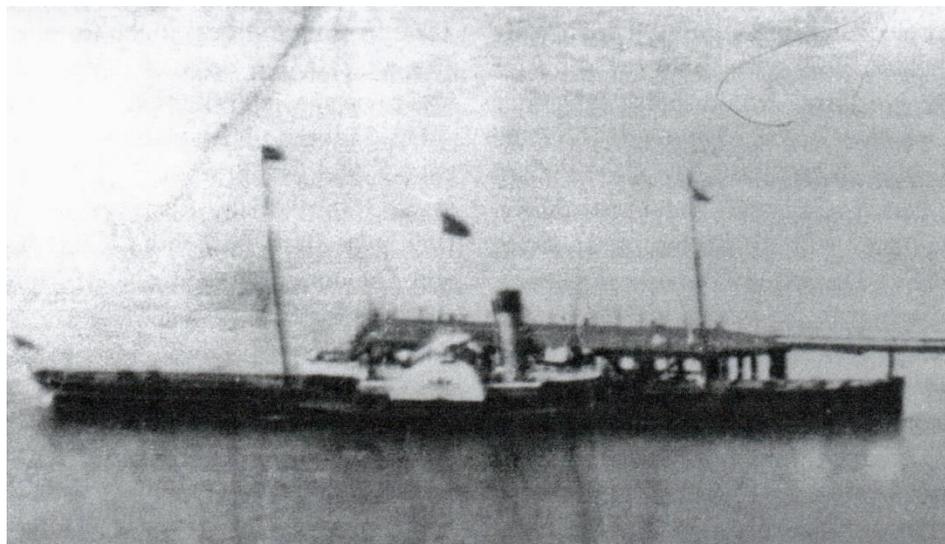

She was then sold to Portsmouth & Ryde United Steam Packet Co. in 1876 and subsequently in 1880 to London & South Western and London, South Coast & Brighton Railway Companies.

The following is quoted from the 'Paddle Steamer Picture Gallery – website.lineone.net'.

"This little iron hulled steamer was built for the Duke of Hamilton's Commissioners for service on the Ardrossan - Arran route."

Whilst she is said to have been fast, she was uneconomical owing to her heavy coal consumption and she was sold for use on the South Coast.

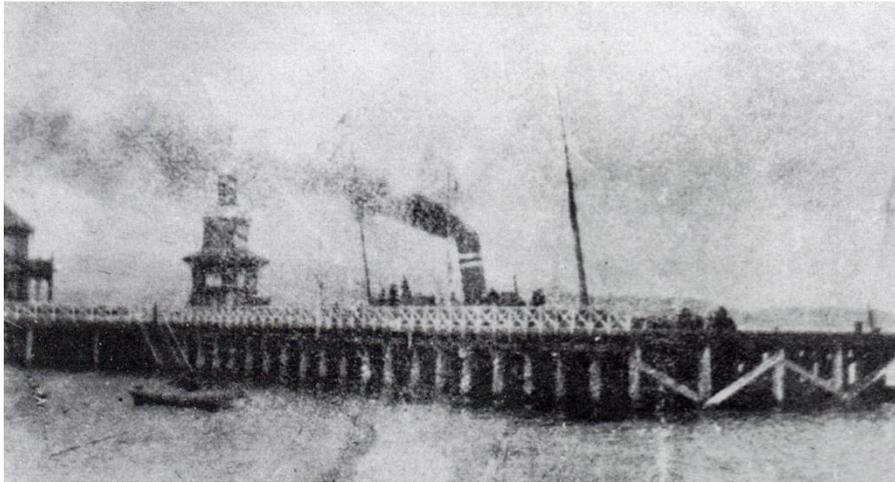

In 1886 during a particularly foggy spell, PS *Heather Bell* almost wrecked herself off the Isle of Wight when rounding the Needles rocks. She had misjudged her position and nearly went through The Needles, but was saved by a fisherman in a small boat who shouted a warning to her crew."

*Heather Bell at Alum Bay, Isle of Wight in the 1980's**
(Note: Now fitted with a second Mast)

Iain MacLeod, in Clyde Steamers No 48, summer 2012, reports that South Coast Steamers Ltd bought *Heather Bell* in 1900 and brought her back to her native waters, however her return visit to the Clyde was short lived.

Note Iain MacLeod, Clyde Steamers Magazine No 48, Summer 2012.*

*Heather Bell, with second mast, pictured at Dunoon's pier during her fated 2 weeks return to The Clyde, in 1900**

It had been intended that she would be used on the Glasgow, Dunoon, Rothsay and Largs service on Sundays. However the Authorities at Dunoon, in order to prevent steamers using the Dunoon pier on Sundays, had secured the pier entrance gates which had large spikes on the top. An ongoing situation had developed over several weeks with police in attendance.

MacLeod quotes *Heather Bell* arrived from Preston on Friday 13th July 1900 and two days later set off from Glasgow on the first of her Sunday sailings. Her arrival at Dunoon was watched by quite a crowd, who had waited for her from noon until she finally turned up at around 2 o'clock. A member of the crew jumped ashore, followed by three or four youths who jumped off the paddle box before the gangway was in place. One or two others then crossed the gangway and the steamer then went on her way to Rothsay and Largs, leaving the passengers to climb over a spiked wall to get off the pier, watched by policemen who made no attempt to prevent them from doing so. The sympathy of the crowd seemed to be with the passengers. *Heather Bell* made no return call that day.

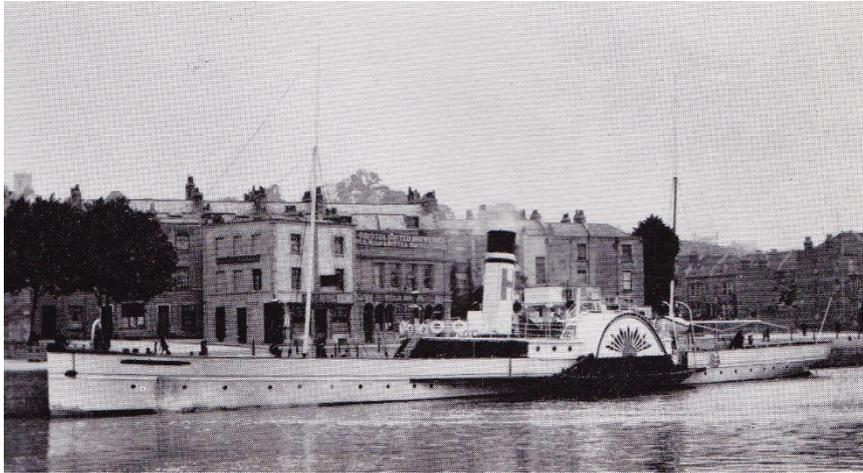

Heather Bell returned on Sunday 22nd July when she landed only one young man who jumped onto the pier, hailed a passing rowing boat which landed him at the adjacent East Bay.

Its last trip was on the following Sunday, 29th July. About five or six thousand lined the Esplanade to be rewarded by a mixture of comic and the potentially dangerous. 13 passengers attempted to tackle the dangerous spikes. Five succeeded, the sixth tore his clothing on a spike and the seventh injured his hand. The police just watched the proceedings. Three passengers climbed over an adjacent wall, two elderly ladies were taken off the slipway by a passing sailboat. The last, a man with a large drum and timpani, visiting to play in a concert, left his instruments under the pier veranda and was helped over the wall. The crowd dispersed.

Note Iain MacLeod, Clyde Steamers Magazine No 48, Summer 2012.*

This was *Heather Bell*'s last trip and she left the river on August 2nd 1900 and again sailed south to Liverpool where she was based for some time for North Wales Excursions.

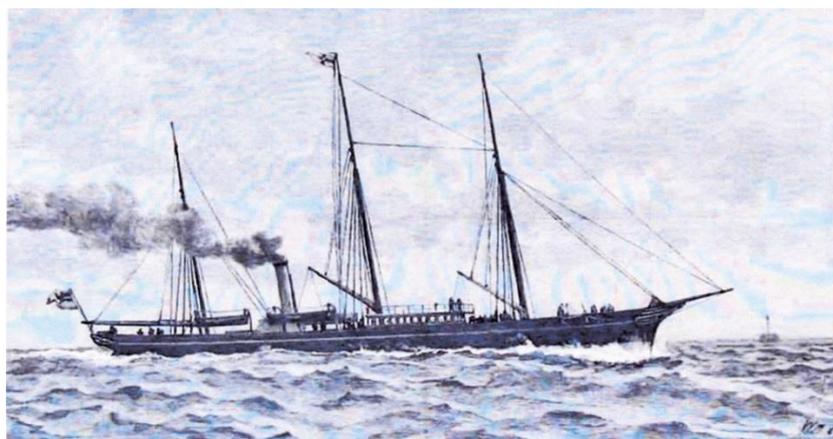

Due to Mortgage payments not being made she was seized in Liverpool in September 1900 and subsequently bought by Edwin Hunt of Towcester in 1901

Vessel History:

1919 omitted from the Register of Yachts as she was 'no longer a yacht.'

By 1921 converted to a cargo ship.

10/1922 damaged by fire in petrol cargo on passage Lisbon to Oporto.

Fate: 1927, Broken Up. **Disposal Detail:** Scrapped in second quarter of 1927.

Note *: Believed these were representatives of HIM Empress Eugénie of France, see later pages.

Note #: *Her naval service was short lived after she nearly floundered on 3rd December 1914. Details later.*

Whilst researching all four vessels, I came across a note at Wickham Market Archive Centre, relating to the following use of *Thistle* whilst in the ownership of the Duke of Hamilton. There was no evidence attached, to back up these anecdotal comments but they raise the following query.

Steam Yacht *Thistle* - Smuggler?

The 186ft long steam 3-masted schooner-rigged yacht was a frequent visitor to Ipswich Dock during the summer months of the 1880s. She was owned by the Duke of Hamilton of Brodick Castle, Buteshire and Easton Hall Suffolk and had been built and engined by Blackwood & Gordon of Glasgow where she was launched in 1881. Taking the years 1887 and 1889 as examples. THISTLE berthed at Ipswich at least four times in June and July, 1887, twice from Amsterdam and twice from Boulogne under the command of her Master Captain Kerr. In 1889 she arrived on the 22nd June from Cowes and again called four times during July and August variously ex-Calais, Amsterdam, Trouville and Boulogne.

A small wooden steam-barge named EAGLET had been built at Ipswich in 1883. Part owned by a corn merchant (48/64ths) and her Master (16/64ths). She was used in the regular hoy* trade carrying general cargo between Ipswich and Orford usually making 3 or 4 round voyages a month. In 1898 her entire ownership (64/64ths) passed to Arthur Heywood of Sudbourne Hall and in 1906 to Kenneth Clarke, also of Sudbourne Hall.

According to word of mouth passed down since those times, the vessel was apparently often tucked under the overhanging counter stern of a certain steam yacht when their visits coincided in the night. Various commodities which may well have perhaps normally attracted some duty were known to have been passed down in the darkness from the steamer's deck for shipment round the coast to the Ore. From here it was but a short journey by horse and trap to Easton Hall, for where the Duke had probably left the vessel when she arrived at Ipswich and could have travelled home by train to Wickham Market.

Note:* Hoy trade relates to the coastal trade of local goods. A corruption of middle Dutch 'hoei'.

Ipswich Record Office holds the Arrival and Departure Logs of all vessels using Ipswich Docks between 1863 and 1895, when the Duke died. The following page contains a chart showing the records copied. *Eaglet* is shown in red. I leave you to make up your own mind.

The Isle of Wight County Press

A weekly newspaper, on sale every Saturday and the IWCP Archives have been useful in indicating that *Thistle* spent some considerable time in and around Cowes and the Isle of Wight and the use to which *Thistle* was put. (Copied from the IoW County Press, as reported.)

5th November 1889 – “The Thistle, ss, Duke of Hamilton, arrived in Cowes Roads on Saturday from the Mediterranean. She came into harbour on Monday and is refitting for the summer.”

10th May 1890 – “The Thistle, ss, Duke of Hamilton, is fitting out and will be painted black instead of white as heretofore.”

21st January 1891 – “The Thistle, ss, Duke of Hamilton, which is undergoing general survey, had her main-mast taken out on Tuesday and it will be replaced by a new one. The rigging has been fitted to the fore and mizzen masts and the extensive work is progressing on board.”

11th April 1891 – “The Thistle, ss, The Duke of Hamilton, had her new main-mast shipped on Friday, and the rigging has since been fitted, and while the yacht has workmen of all trades employed on her, her outfit is approaching completion.”

6th October 1894 – “The Thistle, The Duke of Hamilton, arrived at Harwich on Thursday from Norway.”

16th November 1895 – “The screw-yacht Thistle, the property of the trustees of The Duke of Hamilton, deceased, is having boilers re-tubed by Messrs W. White and Sons preparatory to being surveyed by Lloyd’s, Cowes, Yacht Agency having sold her subject to survey.”

18th July 1896 – The Empress Eugénie will probably spend the first few days of next month at Cowes. Her yacht, The Thistle, is now at that port refitting after its return from the Mediterranean. The Thistle will remain at Cowes roads (sic) during the regatta week.

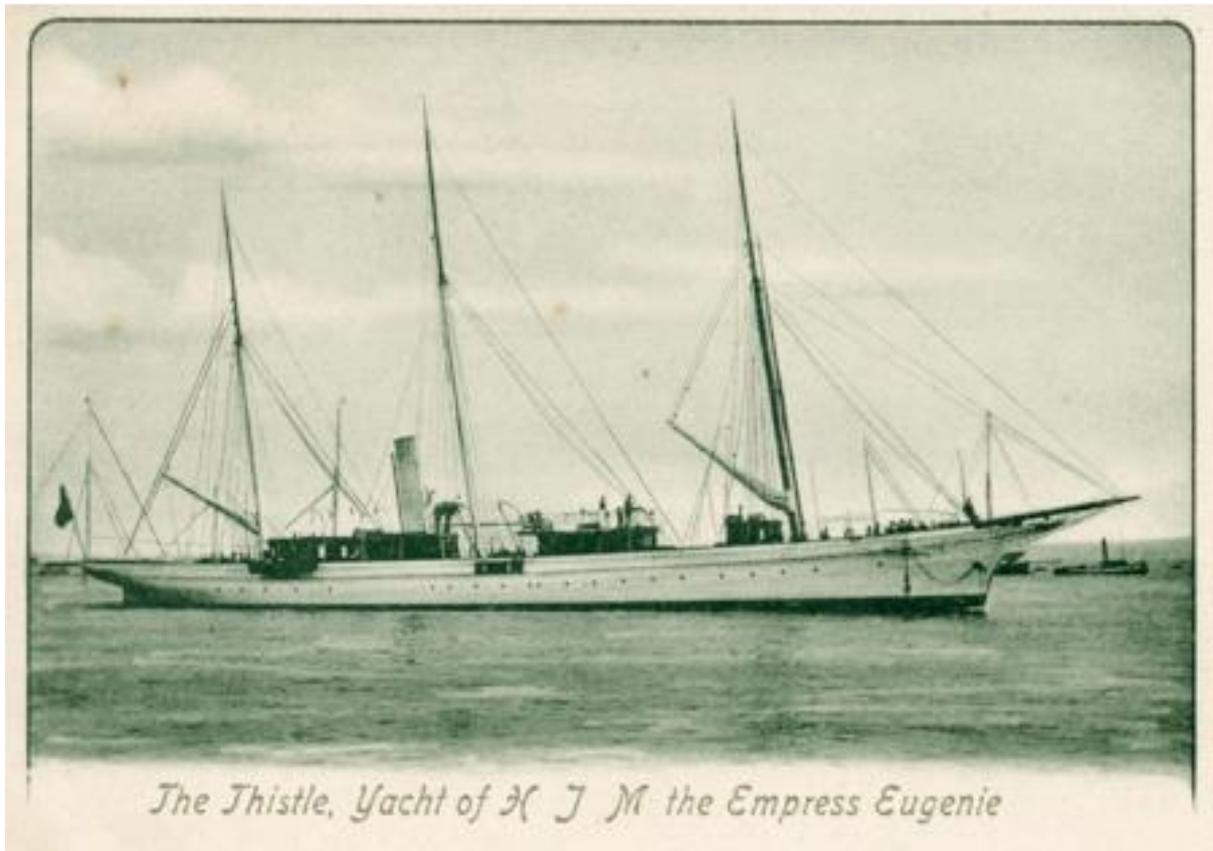

21st August 1900 – (*Note: Osborne House*) Her Majesty the Empress Eugénie, attended by Madame De Arcos, visited the Queen yesterday and remained to Luncheon.

7th August 1909 – (*Note: During Cowes Week which included a Visit by the Emperor and Empress of Russia. The Review of the Fleet took place, followed later in the evening by...many parties on board the yachts,*)

In the afternoon, the King and Queen, accompanied by Her Royal Highness the Princess Victoria, visited Her Majesty the Empress Eugénie, on board her yacht Thistle.” Princess Henry of Battenberg, who had a number of Royal visitors at Osborne Cottage paid a visit to The Empress Eugénie on the steam yacht Thistle. (*Note: This would have been King Edward VII and Queen Alexandria.*)

3rd August 1912 – “On Tuesday afternoon the Queen of Spain visited the Empress Eugénie on the Thistle in Cowes Roads.”

10th February 1917 – “Well-known Yacht Master’s Death. Capt. Francis Albert Upstill. He was at first second officer of the Thistle, and afterwards Captain for 19 years. He was on the Thistle when the vessel was owned by the Duke of Hamilton, at whose death it passed to the ownership of the ex-Empress Eugenie. During his captaincy most of the crowned heads of Europe were entertained on the Thistle, including the Kaiser at Bergen some years ago.”

H.I.M. the Empress Eugénie of France in exile.

Recollections of the Empress Eugénie, Augustin Filon, 1921, extracts from pages 167, 168 & 313

(Publisher's quote "During her Regency in 1870 Filon acted as her Private Secretary and can therefore speak with accuracy and first-hand knowledge. He accompanied the Imperial Family to Chislehurst, England on their escape from France.")

Conditions were very dangerous and she was forced to flee The Tuileries from mobs.

..... The Empress managed to travel by train to Lisieux, where friends drove her to a hotel in Dueville. Dr Evans walked to the quay where he noticed a small but beautiful yacht. The owner of that yacht was Sir John Burgoyne, an English officer. ** The Empress boarded the yacht just after midnight. The passage across was precarious due to winds and storm and a very similar yacht HMS Captain, whose Commander was also called Burgoyne went down. Sir John Burgoyne landed the Empress at Cowes and she crossed to the mainland that evening. (Friday September 9th 1870)

..... But there is a third residence where, during the last 25 years, the Empress has passed some peaceful and not entirely unhappy days. I allude to her yacht *Thistle*, on which she has taken so many cruises in the Mediterranean, around the coasts of Ireland, Scotland and Norway.....

Please see Appendix 4 for photographs of the Empress, her family and homes when in England

Note: *Image of the Thistle from (Astraltrader) Naval-History.net – HMS Thistle (2)*

Note **: *Sir John Burgoyne was a member of The Royal Yacht Squadron, Cowes, his yacht was Gazelle.*

The steam Yacht *Thistle* in the Bay of Naples
 Antonio de Siimone (1851-1907)

Addendum – Second Edition

Visitors' Book from Thistle 1889 – 1890

Thistle's Visitors' book covering the period before and part of 1890 is owned by the Royal Northern and Clyde Yacht Club, Helensburgh, Scotland. The RN&CYC was formed by an amalgamation of The Royal Northern Yacht Club and the Royal Clyde Yacht Club in 1978.

In the mid-19th century yachting quickly became the *thing to do*, providing great recreational and social opportunities for the landed aristocracy and later, the major industrialists. By mid-20th century, the upper middle classes could also partake

The Royal Northern was founded in 1924 in Belfast and contained both an Irish and Scottish Branch. The Irish Branch folded and the Scottish Branch continued. In 1830 it received its Royal Status and became the fifth oldest yacht club in the United Kingdom.

The Clyde Model Yacht Club provided for those whose boats that were too small to be included in the Royal Northern. It also received Royal status in 1871 when the rivalry turned cordial and both achieved dignity and power in the yachting world.

The Duke was a member of the Royal Northern Yacht Club, and was their Commodore from 1862 to 1864 and it is apparent his membership continued at least until 1890.

(Courtesy of the Archivist, Royal Northern and Clyde Yacht Club, Helensburgh)

The Visitors' / Guests' Book for the yacht *Thistle*.

The title does not do justice to the craftsmanship involved in whole concept of the book itself and the velvet lined casket which houses it,

The wooden casket is beautifully made and inset into the top of the lid is a large silver metal plate with detailed engraving by William G Miller, dated 1887, neatly inscribed at bottom right.

The casket is lined with gold coloured velvet and has perfectly preserved the blue leather bound book it contains.

The leather cover is finely tooled round the edge in silver and it carries a very small reserved silver tooling with the name of MacLehose – Glasgow, in the centre of the bottom silver line.

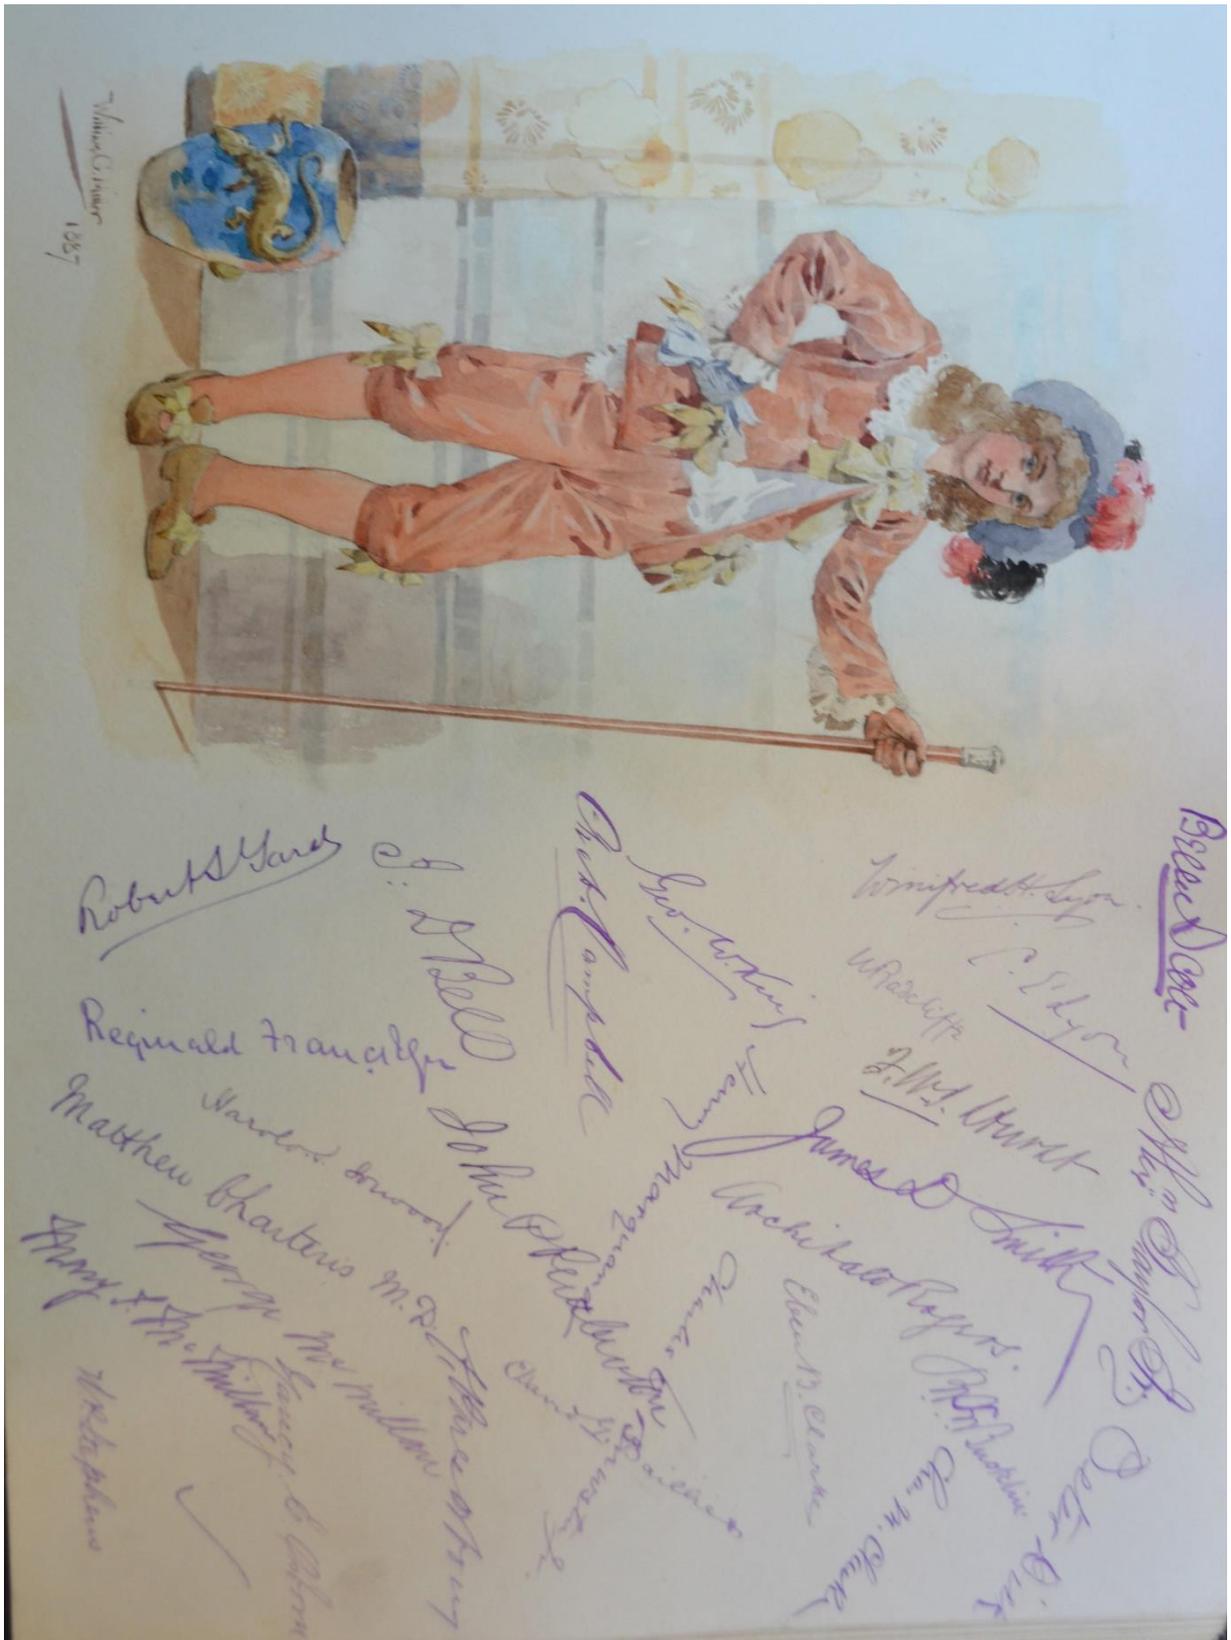

MacLehose was a famous printer, publisher and book binder who specialised in quality work and luxury bindings. He was also publisher for Glasgow University and they hold a Special Collection of 2,000 University books produced by MacLehose. The firm ceased trading in 1982.

Each individual page of the book contains a different watercolour painting, occupying approximately a quarter of the page. The paintings are all by William G Miller and dated 1887. Miller was a well-known artist and engraver and it is fortunate that both examples are gathered together in this item.

To do the visitors' book justice, I reproduce each page separately.

(All images regarding Thistle's Visitors' Book are reproduced by kind permission of the Archivist of the RNLCC)

Appendix 1

The Steamers of Soller 1891 – 1926

The town of Soller needed its own steam ship. The decision was taken with the support of innovative and tireless promoters of progress and development: Joseph Rullan i Mir, priest by calling but progressive humanist and encyclopaedist. Also Jeroni Estades i Llabres, financier, industrialist, Member of Parliament, instigator and master of all the major industrial projects, gas, electricity, cement, the train, maritime transport, the textile factories, etc. etc. Soller exported his oranges to France and Marseille, with its fleet of sailboats. The usual route, Soller, Sète, Barcelona, Palma providing a freight service on the whole route.

The “Compania de Navigacion Sollerense” was incorporated on December 3rd, 1891, with a capital of 200,000 pesetas. It bought in March 1892 a steam yacht, built in 1870 for the 12th Duke of Hamilton under the name of *Thistle*. (Ed.note: The first *Thistle*.)

It was purchased in 1874 by a John Penn Sr. who named it *Pandora* and then by a Mr W.H. Smith of London. On his death, the new Soller Company then purchased the renamed *Leon de Oro* and registered it at the port of Soller.

Of 216 tonnes, 50m long, with a beam of 7.7m, her steam engine of 100 HP propelled it at a speed of 12 knots. This luxury ship arrived at Soller on April 17th, 1892. After the ceremonies of enthusiastic reception and blessing it went to Barcelona on the 21st and underwent changes to adapt itself to its new merchant function. On the 31st April *Leon de Oro* began its rotation Soller – Certe – Barcelona – Ciudadella. The company presented its bid in the tender contest for the mail service Palma – Barcelona. Its more powerful and older competitor *L'Islena Maritima* won the bid with the steamer “Isleno”.

The competition became very hard for *Leon de Oro* and the economic difficulties became serious. In February 1895 the steamer ceased its rotations and the company was declared bankrupt. There was great disappointment both by the population and the entrepreneurs of the city. In the premises of the “Defensora de Sollerense” the promoters of maritime commerce sort a collective participation effort to return the ship into service as a means of exporting their produce.

A new “Compania de Navigacion de Soller” was formed. It redeemed for 60,000 pesetas the *Leon de Oro* put to auction by the trustees of defunct company. According to the records of the Lloyds Register, it is then registered in Las Palmas de Gran Canaria, probably for reasons of cost of registration. On May 16th 1895 the steamer resumed service with stopovers at Palma, Barcelona and Ciudadella, Sète and Marseille.

On July 19th 1896 the Board of the company invited the numerous shareholders who supported the reforming of the company to an excursion to the Torrent de Pareis, celebrating the renewed Sollerique service.

Cont...../

In the port movement records of Barcelona her stopovers are regularly recorded from 1893 to 1904, with particulars of cargo, the number of passengers and captains Mora, Arquimbo, Martorell and Molinas.

In 1904 the steamer was sold to a Catalan ship-owner in San Fellu de Guixols. In 1905 she again changed to a new owner and provided connections between the islands in the Gulf of Guinea for the “Cia los de Vapores Correos Interinsulares Fernando Poo”, under the name of *Elobey Chico*. She sank in 1917 in Cottonou / Benin.

=====

Subsequent Newspaper Reports

The Barcelona ‘La Dinastía’, 26 April 1892

The *Leon de Oro* is a three-masted schooner which sails at 13 mph, with passengers enjoying all the desirable amenities. The décor is luxurious and there is a special very elegant lounge for the ladies.

The Madrid ‘La Epoca’, 18 December 1905

The Captain of the *Elobey* stated that when he left Bilbao at Cabo Villano they were surprised by a heavy storm. The *Elobey* suffered damage by heavy seas which wrecked bow tanks and flooded chambers.

Previously in Guinea due to dirt and low maintenance, problems were constant. The once pristine yacht had become a dirty merchant.

=====

El Siglo Futuro, 7 November 1908

The steamer *Elobey* has been out of service for several months with engine damage.

Appendix 2

The Hamilton – Rothschild Tazza.

*National Museums of Scotland**

Nick Draine

Published at 12.01AM July 18 2012 - Daily Telegraph. (Edited version).

A bowl said to have once been the holy water font of Emperor Charlemagne has become the most valuable object ever acquired by Scotland's National Museums.

Worth "several millions", the Hamilton-Rothschild tazza was allocated to the national collections from the estate of the late Edmund de Rothschild through the Acceptance in Lieu scheme, which allows death duties to be offset by donating works of art to the nation.

Sir Edmund Grossart, chairman of National Museums Scotland, said "The Hamilton-Rothschild tazza is the single most important acquisition that national Museums Scotland (CORR) has made in many decades." It is believed the Byzantine sardonyx bowl – or tazza – mounted on a gold stand was carved from an Indian pebble. Although its use by the founder of the Holy Roman Empire is not recorded, experts at the National Museums Scotland believe it ended up in Cologne Cathedral before being taken to St Petersburg during the Napoleonic Wars.

It was in St Petersburg that the 10th Duke of Hamilton, then British Ambassador to Russia bought the vessel for 9,000 roubles, believing its history lay with Emperor Charlemagne.

Note Reproduced under Copyright Licence.*

Cont...../

The Duke, admired for building up one of the greatest collections of art in Europe, bought a stand for the tazza in 1812 from Royal goldsmiths Rundell, Bridge and Rundell for £241. The stand itself was part of a massive 16th century gold monstrance that King Philip II of Spain had presented to the Monastery of the Escorial.

Once together they formed a centrepiece of the famed collection at Hamilton Palace, housed in the treasury of the vast stately home's west wing. In an inventory made in 1852, the tazza was valued at £2,000

In a show of pride and power by the Duke, it was used for the baptisms of both his children, William the 11th Duke and Susan in 1811 and 1814 respectively. At the time members of the House of Hamilton saw themselves as the premier peers of Scotland, holding three dukedoms and being the true successors of the Stuart kings.

Sir Angus: "It is a key object in the story of Hamilton Palace which was the story of one of the great collectors in Europe, the 10th Duke, who was known as El Magnifico. This tazza was one of the great highlights of his collection. What it confirms is how wide ranging and internationally ambitious he was. Really outward looking, he competed successfully with the great collectors of Europe.

Their First residence in England

FARNBOROUGH HILL
Later Home of the Empress

Farnborough Hill
Later home of the Empress

After the Second French Empire was overthrown in 1870 they took refuge in England where they lived at Camden House, Chislehurst, Kent. After the death of Napoleon in 1873 and that of her son in 1879 she moved to Farnborough, Hampshire in 1885.

She spent some time at Osborne House on the Isle of Wight.

When aged 88, the Empress visited Portsmouth on 6th November 1914 to inspect the gunboat HMS *Thistle* fitting out there.

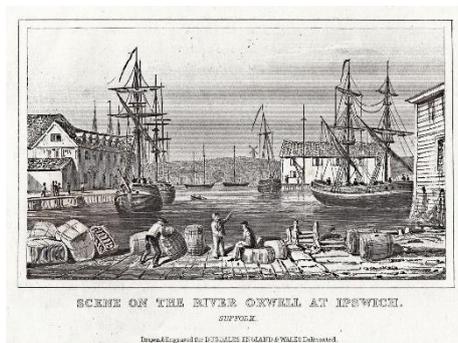

Entry in HMS *Thistle*'s Log for 6th November 1914:

“In pm: Ship’s company drawn up to receive HIM the Empress Eugénie (*of France*), accompanied by the C-in-C and suite to inspect ship. (*The 88 year old empress, widow of Napoleon III and owner of the Thistle, lived in Farnborough, Hants.*)”
